

Proof Printing

Published on 01/27/2022

From the review environment, reviewers can generate and download a PDF of assets including comments, annotations and approval statuses. You can access that option (called "**Print**") via the **Proof Options** menu in the top left-hand corner.

When you select **Print**, you will then be prompted to select an option to '**Print All Pages**' or '**Choose Pages to Print**' to include in your PDF report.

The **Choose Pages** menu will allow you to select the individual pages for your PDF via a checkbox.

 The Print Proof option will only print the Review version you're currently viewing. To print previous [review versions](https://guide.lytho.com/help/intro-review-approval#review-versioning) (<https://guide.lytho.com/help/intro-review-approval#review-versioning>), navigate to the version you would like to print and follow the above instructions.

Once you have selected the pages you would like to include, click **CHOOSE PAGES** and then click the final **PRINT** button. Banners will then appear at the bottom of the review environment indicating PDF preparation and readiness. Once the PDF is ready to download, you will select the **PRINT** button located in the green banner at the bottom center of the screen.

The generated PDF file will include a cover page with a summary of reviewer approval statuses. Each subsequent page will then show images of the included assets with annotations alongside reviewer collaboration.

Can we replace this image with one showcasing a lot of students talking around a table? Something that showcases the collaborative nature of our institute. May 06, 2024 03:51 PM EDT
