Release Notes - January 13, 2020

Published on 01/27/2022

New Features

Bulk Date Shifting in Gantt Views

Does your team frequently have to accommodate shifting project deadlines? Now it's easy to adjust dates on multiple tasks or proofs quickly! From Gantt Views (https://lytho.knowledgeowl.com/help/gantt-view), visualize the entire project timeline and shift the start or due dates for multiple tasks and proofs in seconds.

Use Shift+Click, CTRL+Click, or Cmd+Click and drag to shift multiple work items.

Improvements

Now when you accept a request, you'll automatically be redirected to the new work item details view in either of these two scenarios:

- You're a member of the newly created work item
- You have the **View All** permission for that type of work item

"**Submitted review**" email notifications now include the remaining number of essential reviewers.

Haven't enabled "**Submitted review**" notifications yet? Toggle them on in your **Personal Settings**.

Submitted review
Notify me when each reviewer has submitted their approval status on a proof.

Users who have been invited to ignite and have not set up their account yet will be reminded one day before the invitation expires.
