

Release Notes - December 9, 2019

Published on 01/27/2022

New Features

Gantt Views

Gantt Views (<https://lytho.knowledgeowl.com/help/gantt-view>) give you a dynamic way to view the timeline and dependencies between tasks and proofs within a project. Now it is even easier to identify the impact that adjusting the schedule of work will have on the overall project timeline so teams can manage projects more efficiently to hit deadlines with stakeholders.

Automatic Date Calculations

Leveraging **Automatic Date Calculations** (<https://lytho.knowledgeowl.com/help/automatic-date-calculations>) helps creative teams get started on projects faster by automatically calculating start or due dates for a project based on your specifications in the project template. Automatic Date Calculations are both robust and flexible, allowing teams to customize any workflows, better define SLAs with their stakeholders, and set proper expectations around delivery dates.

NEW PROJECT IMPORT

Project Name *

Create from Template

i Set a due date to calculate dates for this project.

Start Date Due Date
 Calculated from due date

This project template calculates the start date based on the due date selected.

Submitted Review Notifications

Proactively keep tabs on the progress of your reviews! Now, instead of having to check a proof to see who has submitted and who has not, you can choose to receive notifications when each individual reviewer submits their review. Enable this notification preference in your Personal Settings.

 **Grace Deng** submitted their review of [Full Page Print Ad](#) with the aggregate status of Approved As Is
just now

Improvements

Requesters will now be notified when a request name is changed by an admin.

 **Christy Drucker** updated the name of your request from *Video* to [Social Media Video- Sunflower Scent Line](#)
just now

Users will now see a warning when attempting to upload files that exceed the maximum file size limit.

Drag and drop to attach files.

file_name.ext (1,024 GB) is too large to upload. File size limit is 2 GB. ×

Single Sign-On users who update their email address within their preferred service provider will now see those changes reflected in ignite.
